Aubrey Lacey
1725 Bemidji Ave N, 304
Bemidji, MN 56601

Dear Aubrey,

I am writing this letter at your request for you to give to your medical/surgical team to substantiate readiness for gender affirming medical care.

I am providing this letter regarding Aubrey, who requested to be called Thomas, at the client's request to substantiate readiness for gender affirming medical care as established in the World Professional Association for Transgender Health (WPATH) Standards of Care, Version 8 (SOC 8). Thomas requested use of the pronoun him. I will use Thomas's preferred name and pronouns throughout this letter.

As a provider who has experience in treating clients with gender dysphoria, I completed a diagnostic assessment of Thomas on 11/11/25. This letter represents my conclusions from that assessment, information obtained from clinical consultation with his therapist, and careful consideration of the WPATH SOC 8.

Thomas meets criteria for Gender Dysphoria.

I have evaluated Thomas for mental health diagnoses and have diagnosed the following: Post-Traumatic Stress Disorder. Thomas is participating in treatment to address these mental health issues currently. I believe Thomas's mental health issues have been addressed sufficiently and do not interfere with their ability to understand or make decisions about gender affirming care.

In my treatment of Thomas we have discussed and he has articulated an understanding of the nature, purpose, and outcomes of top surgery (double mastectomy) and the risks, benefits, and alternatives to this treatment. Thomas has the capacity to provide consent for top surgery.

In summary, I believe that this procedure is medically necessary and Aubrey meets the WPATH requirements necessary for this step of the gender affirmation process. In this context, medically necessary is defined as necessary for Aubrey's psychological wellbeing. Considering the progress Aubrey has made toward transition thus far, and in the absence of significant contraindications from a psychological or social point of view, based on the WPATH SOC 8, Aubrey eligible for consideration for top surgery (double mastectomy).

Aubrey will have continued access to my services for care and support. I am available for coordination and welcome any communication, as needed. I can be contacted at jacob.levine@sagentbh.com or by phone at
