RE: ZOE (MILO) HOLT (and NAME USED IF DIFFERENT THAN INSURANCE NAME)

DOB: 01/28/2002

To whom it may concern:

I am writing this letter on behalf of Zoe (Milo) Holt. It is my understanding that Zoe (Milo) will be scheduling a consultation with you regarding Gender affirming surgery.

I am a therapist at Conscious Healing Counseling and have assessed the psychosocial readiness and eligibility of Zoe (Milo) who is seeking surgery at this time. I have worked with Zoe since 1/22/2026 in a weekly manner. During this time, Zoe (MILO) has presented himself as consistently as having a gender queer identity. He lives his life fully and openly in this role. He has the support of his partners, and his roommate's family members to pursue confirmation surgery to align his identity and physical body.

From a clinical standpoint, I see no valid reason to deny Zoe's (Milo's) request for gender confirmation surgery. Zoe (Milo) meets the criteria for gender dysphoria as defined in the ICD-10/DSM-5 (F64.0). The dysphoria that Zoe (milo) currently experiences arises from the incongruence between his body and his gender identity. This results in significant discomfort with his misaligned body, not on any internal sense of conflict or ambivalence regarding his gender identity. This distress causes Zoe (Milo) to experience heightened anxiety. Rectifying his body incongruence is reasonably expected to provide marked relief for the anxiety and distress that Zoe (Milo) experiences, thereby allowing him to live a fully functional and meaningful life in society without further impairment. Zoe (Milo) has no history of, nor does he present with, any medical or psychiatric co-morbidity that would preclude him from giving informed consent for gender confirmation surgery.

If you have further questions, you may contact me at (314)-210-7217

Sincerely,

Gabrielle Holloway, MSW, LICSW
