Re: George Prochaska

DOB: 04/24/2003

Patient goes by: Courtney

To whom it may concern,

I am writing in support of my patient, George Prochaska, who goes by Courtney and will be undergoing gender-affirming surgery with Dr. Pariser at M Health Fairview and/or Dr Min Jun of Jun Surgical for the condition of gender dysphoria. The proposed procedure is: sex reassignment surgery.

Our clinicians at PPNCS health centers have had the opportunity to provide gender affirming care for Courtney in their clinics since April, 2023 . Courtney began feminizing treatment with estrogen at that time and has been living exclusively as female for over 3 years. The patient has the capacity to make fully informed decisions and to consent to treatment.

Clinical rationale for surgery is gender affirmation, to better align the external body with the internal gender. Courtney has met the criteria outlined by the World Professional Association for Transgender Health's: "Standards of Care for the Health of Transsexual, Transgender and Gender Nonconforming People", and I support this procedure as medically necessary for Courtney's overall health.

If you have any questions, please contact our clinic.

Respectfully,
