Regarding:
Legal Name: Georgina Claire Mitchell
Preferred Name: Georgina
DOB: 06/18/1998
Name of Surgery: Orchiectomy

To Whom It May Concern:

Georgina is a patient under my care and has been a patient at this practice since October of 2024. Georgina has a gender identity of female, which is well established and stable.

I am a DNP who specializes in transgender health. By my independent evaluation, I have diagnosed her with Gender Dysphoria (ICD-10 F64.1/F64.9).

Georgina notes that she first knew her gender identity differed from her assigned sex at age eight. She has socially transitioned through her gender expression and pronouns with friends and family. She has been successfully and consistently living in a gender role congruent with her affirmed gender since June of 2025. She has been consistently on hormone therapy since October of 2024.

Despite the above interventions, she reports significant symptoms of anxiety, depression, and distress due to her dysphoria. She relates much of her Gender Dysphoria to her genitalia.

Georgina has expressed a persistent desire for orchiectomy. In addition, she has sufficient social support to move through the surgical process. She is stably housed and has prepared for her post-op recovery. She does not currently have a substance use disorder.

Georgina would benefit greatly both medically and psychologically from orchiectomy, which has been deemed as medically necessary by the World Professional Association for Transgender Health. Georgina has more than met the WPATH SOCv8 criteria for surgery. She has the capacity to provide informed consent for orchiectomy and she is ready and appropriate for this procedure. I hereby recommend and refer for this surgery. Please feel free to contact me with any questions or concerns.

Sincerely,

Electronically Signed by: ERICA IMAOKA, DNP, CNM
